

SIYADH ABDUL SALAM KC

Backend Engineer | Python | Django | DRF | Application Security

siyadhkc@gmail.com | +91-9605938729 | Kerala, India | [siyadhkc.app](#) | [linkedin.com/in/siyadhkc](#) | [github.com/siyadhkc](#)

PROFESSIONAL SUMMARY

Backend Developer with experience building scalable REST APIs, multi-tenant SaaS applications, and production-ready backend systems using Python, Django, Django REST Framework, PostgreSQL, Redis, and Docker. Experienced in authentication, authorization, API design, database modeling, and backend performance optimization.

Previously worked as a Network & Hardware Engineer, providing a strong foundation in TCP/IP, network architecture, troubleshooting, and infrastructure operations. Currently expanding expertise in Application Security, API Security, OWASP Top 10, and Web Penetration Testing.

Passionate about building secure, reliable software and seeking opportunities in Backend Engineering, Platform Engineering, or Application Security-focused development teams.

WORK EXPERIENCE

Techoals Technologies, Full-Stack Developer Intern

2025 – 2026 | Kerala, India

- Built HireFlow, a full-stack recruitment platform using Django REST Framework and React, implementing JWT authentication, RBAC, and workflow-based candidate management.
- Developed MockAPI Pro, a multi-tenant API mocking platform supporting dynamic endpoint generation, request logging, latency simulation, and isolated workspaces.
- Migrated legacy infrastructure to Django 4.2 LTS, resolving framework compatibility issues and improving application stability.
- Implemented automated testing using pytest, achieving over 85% API test coverage.
- Designed and documented REST APIs using Postman and OpenAPI-style documentation practices.
- Collaborated across backend and frontend components, improving development workflow and deployment reliability.

Sky Light Technologies, Network & Hardware Field Engineer

2022 – 2024 | Kerala, India

- Installed and maintained enterprise networking, CCTV surveillance, biometric access control, and security systems.
- Configured switches, IP devices, structured cabling, and TCP/IP-based infrastructure for commercial and residential environments.
- Diagnosed and resolved network, hardware, and connectivity issues under operational deadlines.
- Conducted site surveys, system planning, deployment, testing, and client handover activities independently.
- Produced technical documentation including network layouts, device configurations, and troubleshooting records.

PROJECTS

MockAPI Pro (Open Source) [🔗](#), Django · React · PostgreSQL · Redis · Docker · Nginx

- Architected a multi-tenant SaaS platform using PostgreSQL isolation strategies and secure API design principles.
- Implemented Docker-based deployment architecture supporting development and production environments.
- Designed scalable REST APIs supporting dynamic endpoint generation and response customization.

Env-Guard [🔗](#), Python · Security · CLI

- Developed a security-focused CLI tool that detects exposed API keys, tokens, credentials, and secrets before code is committed or published.
- Implemented pattern-based secret detection and recursive filesystem scanning to identify sensitive information across source repositories.
- Reduced the risk of accidental credential exposure by identifying API keys, tokens, and secrets before code publication.

Food Delivery Web Application [🔗](#), Django · DRF · React · PostgreSQL · JWT · Razorpay · ReportLab · Recharts

- Built and secured 25+ REST API endpoints with JWT authentication, RBAC, and server-side payment validation.
- Designed normalized relational database schemas supporting customers, vendors, riders, and administrative workflows.
- Integrated analytics dashboards and automated invoice generation for operational reporting.

TECHNICAL SKILLS

Languages: Python, C, Bash, JavaScript, SQL, HTML5, CSS3

Backend: Django, Django REST Framework (DRF), Celery, Redis, REST API Design, JWT Authentication, RBAC

Frontend: React, Vite, Tailwind CSS, Axios

Databases: PostgreSQL, MySQL, Database Design, Query Optimization, Data Modeling

DevOps: Docker, Nginx, Linux, Git, GitHub, CI/CD Fundamentals

Testing: Pytest, Unit Testing, Integration Testing, API Testing

Networking: TCP/IP, DNS, DHCP, VLANs, Cisco IOS, Switching, Routing, Network Troubleshooting

Security: OWASP Top 10, OWASP API Security Top 10, API Security Testing, Web Application Security, Burp Suite, Vulnerability Assessment, Secure Coding

EDUCATION & CERTIFICATIONS

Certified Penetration Tester, Ehackify Academy Calicut

2026 – Present | Kerala, India

Hands-on training covering OWASP Top 10, API security testing, vulnerability assessment, and exploitation. Currently pursuing practical training in Web Penetration Testing and API Security through Ehackify.

Python Full-Stack Development, Techoals Technologies

2025 – 2026 | Kerala, India

Covered Python, Django, REST APIs, React, PostgreSQL, Git, and deployment workflows. Practical projects included full-stack applications with authentication and database integration. [Certificate Awarded]

Diploma in Networking & Computer Hardware, Bsoft Institute

2021 – 2022 | Kerala, India

Networking fundamentals, Cisco IOS, IP addressing, switching and routing, hardware maintenance, and enterprise system deployment.
